## Did You Know?

A study conducted by the United States Tennis Association (USTA) found that:

- 48% of kids who play tennis average an “A” in school
- 81% of those kids attend college
- 73% of them never get sent to the principals office
- 82% of kids who play tennis volunteer in their communities

Tennis can decrease your risk of heart disease, enhance your flexibility, boost your brain power, improve your brain health, and help you lose weight.
